CAREER OBJECTIVE

A versatile, tech-driven professional with a strong foundation in full-stack web development (JavaScript, TypeScript, React.js, Next.js, and MongoDB) and a background in Mathematics. Seeking a **Marketing Intern** position at an innovative software company where I can bridge technical understanding with growth and outreach strategies. Highly adaptable and open to versatile career paths across software development, product management, or digital marketing.

KEY PROJECTS

Bazar Dor
TypeScript • Next.js • MongoDB

A Bengali-language market price information app that helps people check everyday product prices, compare price changes, and browse products by category. It also includes account sign-in and profile management.

Personal Task Manager
React • TypeScript

Application to manage, organize, and keep track of daily work efficiently and improve overall productivity.

CinePulse
JavaScript • React • TVMaze API

Fully responsive TV show portal for finding favorite shows with interactive component states and seamless data fetching.

Geometry Genius
Vanilla JavaScript • DOM

Interactive web application for dynamic area and volume calculations of various geometric shapes.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, TailwindCSS, better-auth

Database & Backend: MongoDB, Node.js, Express.js
